COURSE OVERVIEW

The government accounting is considered one of the basic subjects studied by the students of the accounting department in the second stage because of its scientific and intellectual importance for the coming years of study . It also provides a theoretical framework for the accounting system in the government units for all the operations that it performs in analyzing, recording and tabulating the accounting data according to proven scientific methods Which helps the recipient to acquire these experiences in order to benefit from them both in the scientific and practical aspects, and this is what is required of the work of government units in our time.

GOALS AND OBJECTIVES

The purpose of this article is to understand and understand the methods of accounting registration for all operations carried out by government units by providing a theoretical framework for the accounting system in government units, as well as linking the theoretical framework with the practical practice, with analytical study of the most important Iraqi laws and regulations governing accounting practices in government service units .
