Course Description Form

Academic Program Description

This academic program description provides a concise summary of the program's main features and the expected learning outcomes that students are required to achieve, serving as evidence of whether they have made the most of the learning opportunities provided. It is accompanied by a description of each course within the program.

- 1. Course Name: Community Medicine Theoretical Program
- 2. Course Code: MED405 COM
- 3. Level: Annual Course / Fourth Year
- 4. Date of Preparation: 24/07/2025
 - 5. Attendance Modes: 5.

In-class lectures

Online lectures .1

- 6. Total Study Hours / Units: 105 theory hours / 7 units
- 7. Course administrator's name (mention all, if more than one name)

Prof Dr Abdulkareem A Mahmood

Prof Dr Ali A. Sdoon

Prof Dr Ali Al Mosawi

Pro Dr Ali Abdul Ridha Kadhim

Dr Basheer Aqeel Muslim ,Assis.Prof

Maher Jawad Kadhim

Dr Hajer K Aloosi

Dr. Buraq M Raheem

8. Course objectives

- 1. To acquire basic knowledge on main components of community medicine interests
- 2. To develop relevant competencies and skills in epidemiology and statistics so as to be able to measure and evaluate health and health care services
- 3. To develop abilities and competencies in the epidemiology and control of major health problems at population level
- 4. To develop basic principles of scientific research
- 5. To develop understanding of primary health care as strategy and services to the population
- 6. To contribute to the requirements of graduation of competent doctors to serve national, regional as well as local goals
- 7. To be prepared for postgraduate training in the future
- 8. To be prepared to pursue self-learning towards continuing professional development.

	Tea	ication of blended learning (in-class and online in ca aching in large groups divided into two subgroups fo	or theoretical sessions		strategy
